

TITANFI

Strength • Stability • Scale

Where DeFi meets unstoppable growth

On-Chain • Transparent • Audited

Vision — Why TitanFi

100% On-Chain

Renounced & immutable smart contract with no owner functions

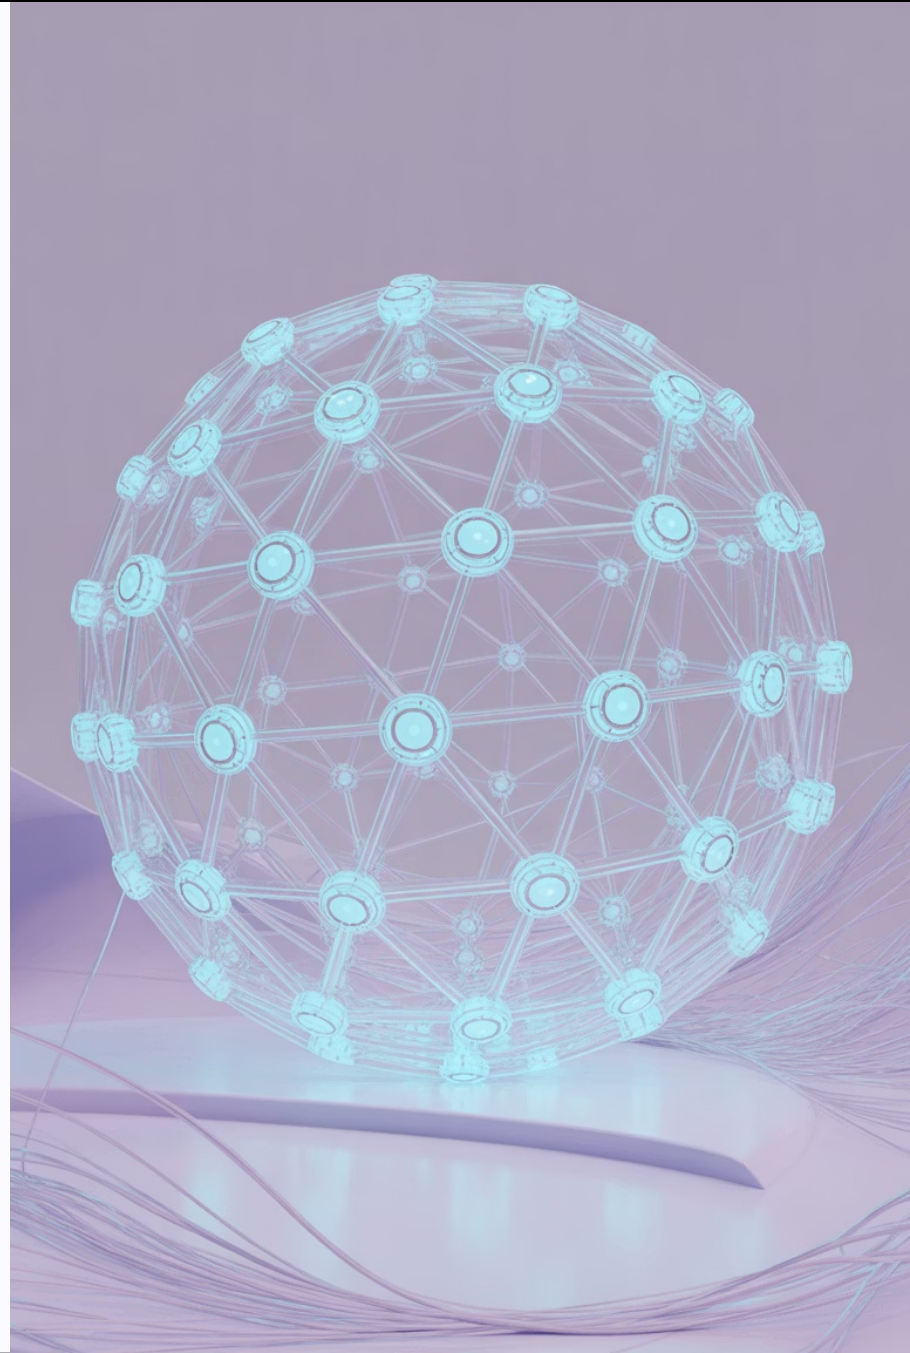

Real-Time USDT Rewards

No trading or volatility bets—just consistent, predictable returns

Global Network

Built for investors and network leaders worldwide

How It Works

TitanFi operates through a simple, transparent four-step process that puts you in control of your investments.

01

Deposit USDT

Select a plan and deposit USDT. Your capital locks until maturity for guaranteed returns.

02

Rewards Accrue

Rewards accrue per second on-chain from the moment of deposit.

03

Claim Anytime

Claim your rewards whenever you want with a simple 1-hour cooldown between withdrawals.

04

Network Income

Event-driven referral & leadership rewards trigger when a downline withdraws ROI or matured capital.

Fixed Daily ROI Plans

Choose from six investment tiers designed to match your capital and timeline. All plans feature per-second ROI accrual and flexible reward claiming.

Plan	Duration	Daily ROI	Min Deposit
Beginner	7 days	0.6%	\$10
Basic	14 days	0.8%	\$50
Standard	30 days	1.0%	\$100
High	60 days	1.2%	\$500
Premium	90 days	1.4%	\$2,500
Elite	120 days	1.8%	\$5,000

☐ Key Notes: ROI accrues per second from deposit time. Capital withdrawable after plan maturity; rewards claimable anytime with 1-hour cooldown. Withdrawing principal stops ROI for that plan.

Safety & Transparency

TitanFi is built on a foundation of security, immutability, and complete transparency. Every aspect of the platform is designed to protect your investment.

Renounced Contract

Single immutable smart contract with no owner functions. Once deployed, parameters cannot be changed by anyone.

Public Audits

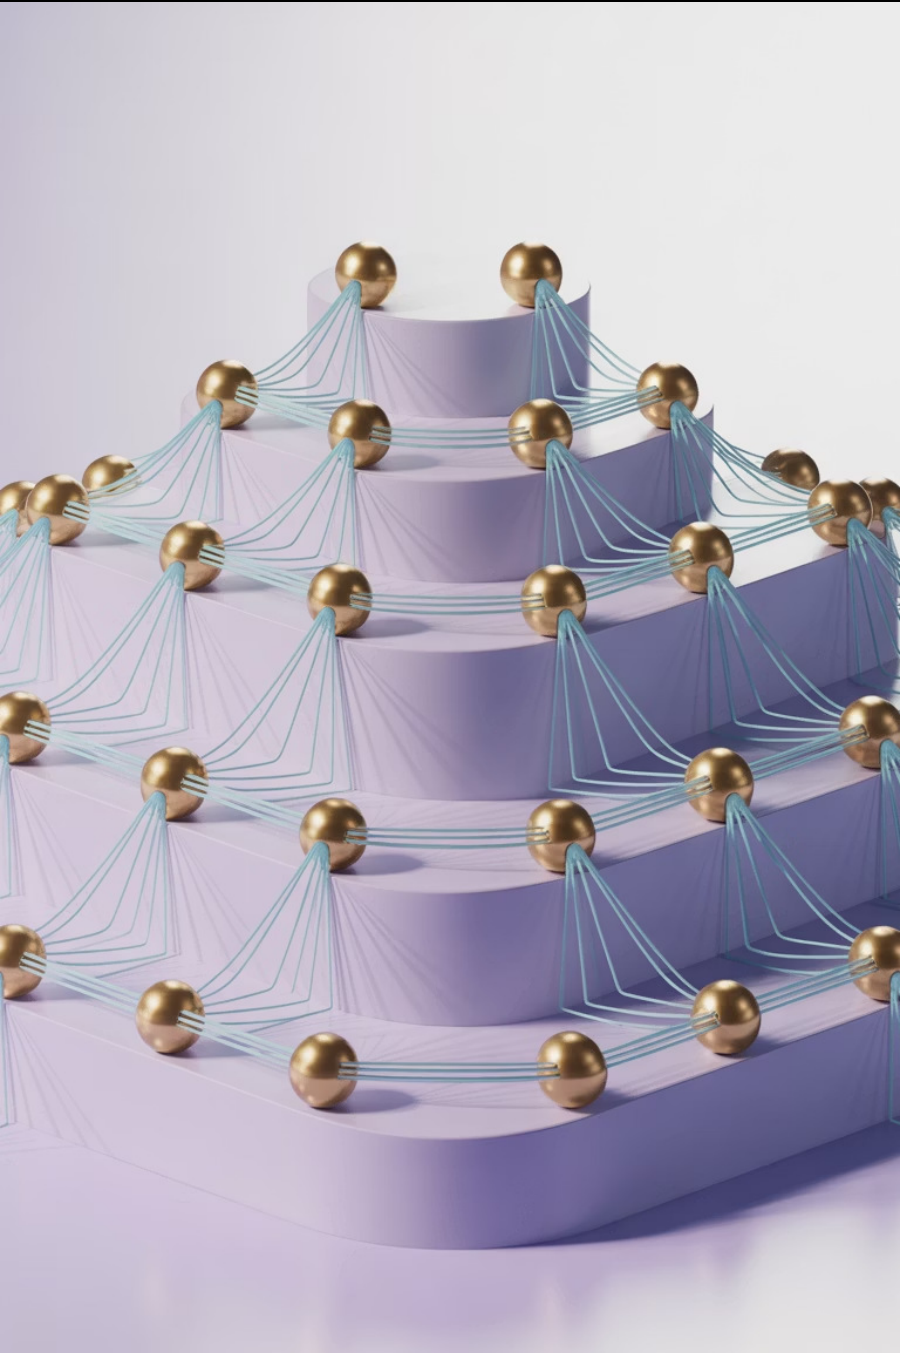

Verified contract address and publicly available audit reports ensure complete transparency and security.

Transparent Fees

10% platform fee on deposits automatically sent to immutable fee wallet set at deployment.

On-Chain Events

All deposits, claims, and matured principal withdrawals are recorded on-chain for complete auditability.

Referral System — Overview

Network Structure

TitanFi features a powerful unilevel structure with 20 levels of generational income, distributing a total of **69%** of rewards across your network.

The system operates on an event-driven trigger model: referral income is credited only when a downline withdraws ROI or matured capital.

Progressive Unlocking

Access deeper levels through a progressive unlock model based on your Self AUM and number of direct referrals.

Build unlimited breadth with direct referrals, while depth is capped at 20 levels for referral payouts, ensuring sustainable and fair distribution.

Referral Unlock Conditions

Progressive unlock system based on Self AUM and active directs. Self AUM grows by \$50 per level from L2 (\$50), following the formula: AUM for Level n = \$50 × (Level – 1), except L1 = \$10.

Levels	Self AUM Range	Directs Required
L1	\$10	0
L2	\$50	0
L3-L5	\$100 → \$200	0
L6-L10	\$250 → \$450	3
L11-L15	\$500 → \$700	5
L16-L20	\$750 → \$950	7

☐ **AND Condition:** Both Self AUM threshold and Directs requirement must be met. If Self AUM drops below a level's threshold, that level re-locks. Only directs with active deposits ≥ \$10 count.

Examples: \$300 AUM + 2 directs → max unlocked = L5 (needs 3 directs for L6). \$950 AUM + 7 directs → all 20 levels unlocked.

Referral Percentages

The 69% total distribution is allocated across 20 levels with decreasing percentages as depth increases. Higher levels receive larger shares to reward direct relationship building.

69%

Total Distribution

Across all 20 levels

Percentages apply to the eligible reward amount generated by the withdrawing user. Payouts occur only when downline members withdraw ROI or matured capital.

Leadership Program — Ranks

Advance through seven prestigious leadership ranks based on your team size. Each rank unlocks higher reward percentages on your network's activity.

Rank	Team Size (Active)	Reward %
Community Manager	200	0.5%
Team Ambassador	500	1%
Brand Ambassador	1,000	2%
Partner	3,500	3%
Verified Partner	5,000	5%
Co-Founder	7,500	7%
Director	10,000	10%

Leadership Logic — Differential & Depth

Differential Rule

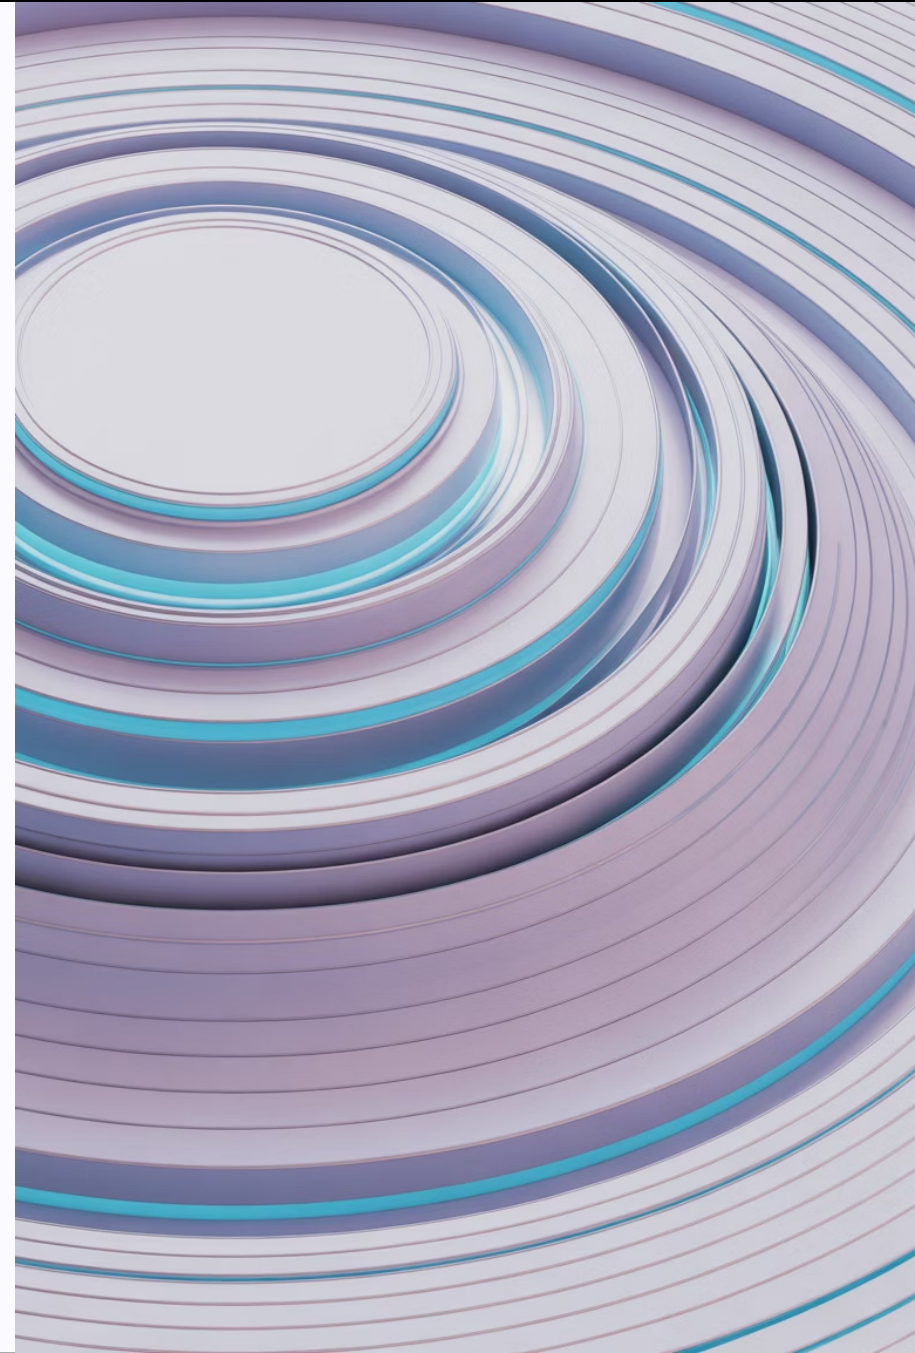

You earn the percentage difference versus the highest-ranked person already encountered below you in that leg.

Example: You at 10% (Director), strongest downline at 7% (Co-Founder) → you earn **3%** from that leg's eligible team rewards.

Depth & Trigger

Leadership differential is applied up to **50 levels** upward from the withdrawing user with unlimited breadth.

Paid only when the downline withdraws—same event-driven trigger as referral rewards.

Payout & Cooldown Mechanics

Event-Driven Payouts

Referral and leadership rewards are calculated and credited automatically when a downline withdraws ROI or matured principal.

Cooldown Period

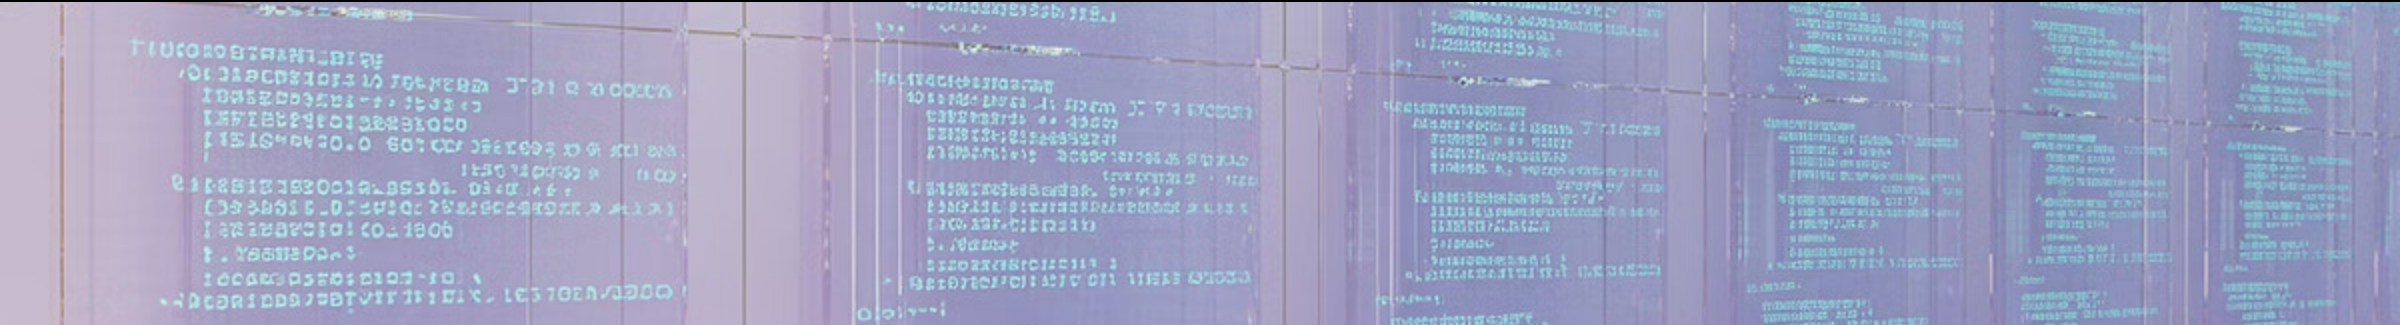

1 withdrawal per user per 3600 seconds (1 hour). Applies to both ROI claims and matured principal withdrawals.

UI Timer

Dashboard displays a countdown timer showing when your next withdrawal becomes eligible.

Smart Contract Notes

TitanFi's smart contract architecture ensures complete security, transparency, and immutability through carefully designed on-chain mechanisms.

Single Renounced Contract

No owner functions—completely immutable once deployed. No one can modify parameters or access funds.

Immutable Fee Wallet

Constructor-set fee wallet for the 10% deposit fee. Cannot be changed after deployment.

On-Chain Events

Deposit(user, amount, planId, timestamp) •
Claim(user, amount, kind, timestamp) •
WithdrawPrincipal(user, amount, planId, timestamp) •
PlatformFeeTransferred(amount, wallet, timestamp)

Getting Started

Join TitanFi in four simple steps and start earning real-time USDT rewards today.

Connect Wallet

Connect your Web3 wallet—MetaMask, Trust Wallet, or SafePal supported.

Deposit & Select Plan

Deposit USDT and choose from six investment plans matching your goals.

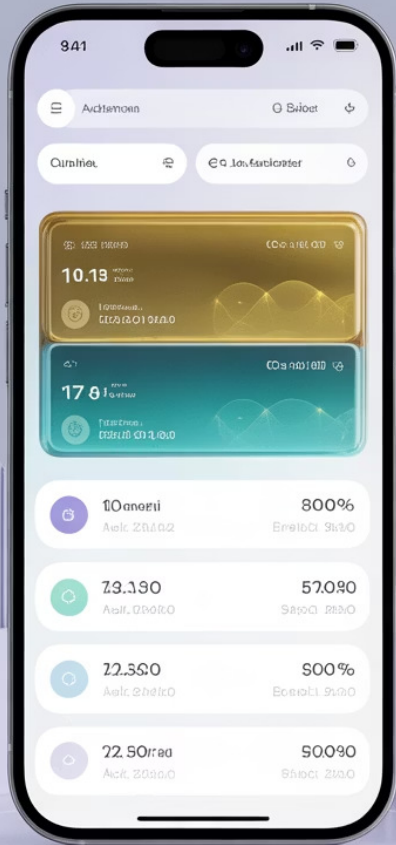

Share Referral Link

Expand your network and unlock deeper levels by sharing your unique referral link.

Claim Rewards

Claim your ROI anytime while respecting the 1-hour cooldown between withdrawals.

Proof & Transparency

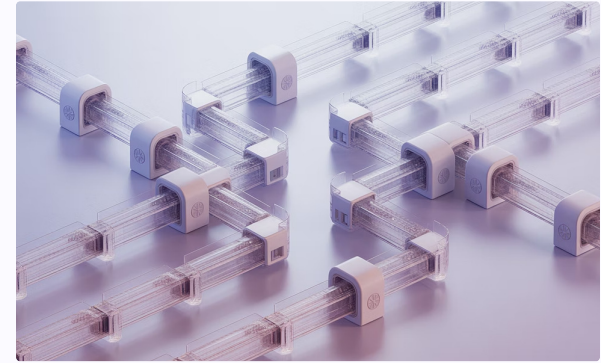

Published Documentation

Access our contract address and comprehensive audit links, publicly available for verification. Every line of code is open for inspection, ensuring full transparency.

Real-Time Dashboard

Your personalized dashboard provides real-time updates on ROI accrual, unlocked levels, leadership status, and latest payouts, keeping you informed instantly.

Immutable Fee Routing

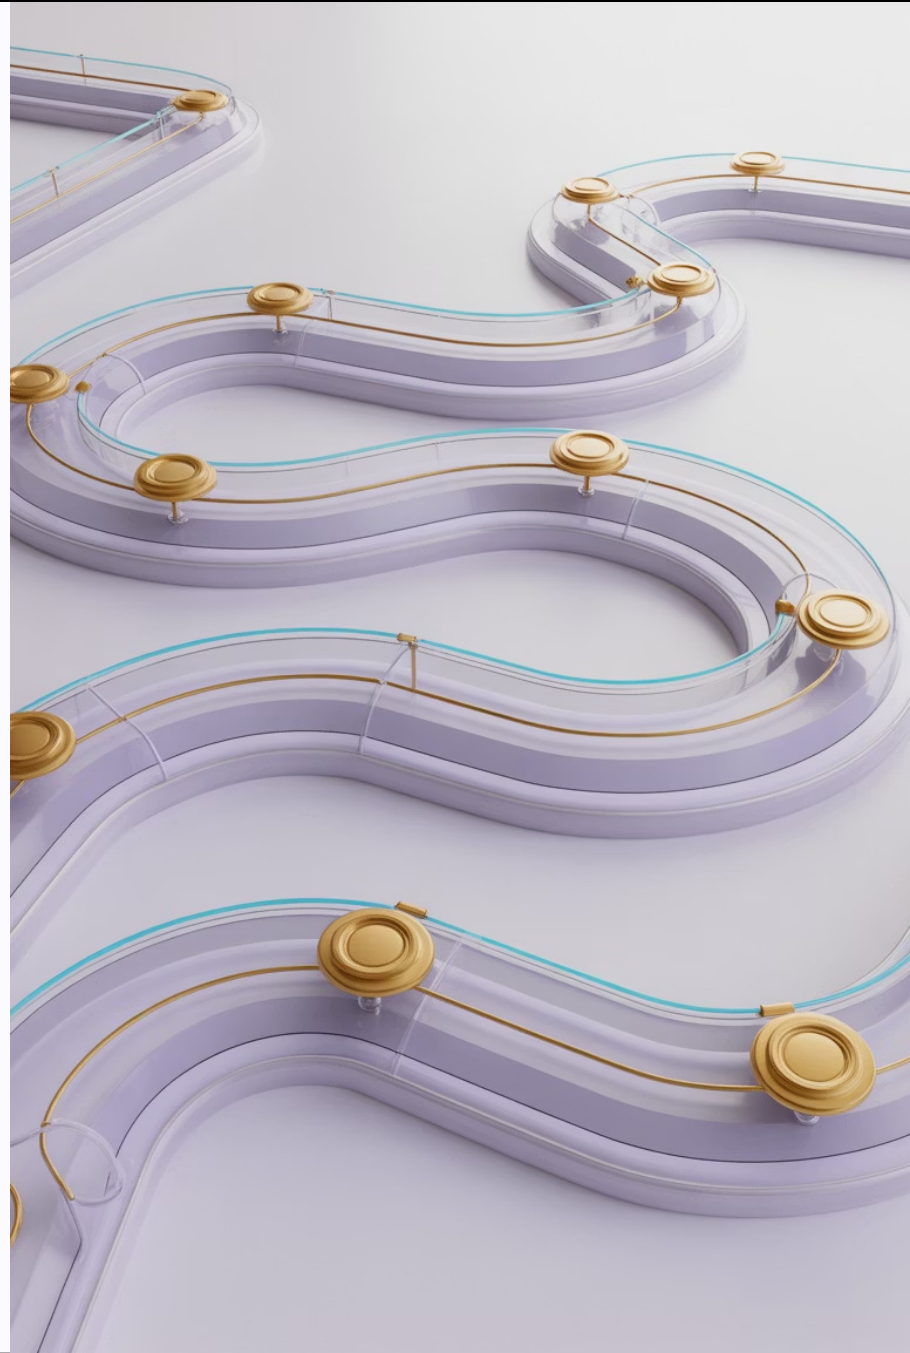

The 10% deposit fee is automatically routed to a predefined wallet set at contract deployment. This process is immutable, requiring no human intervention.

Roadmap

TitanFi's strategic roadmap focuses on continuous innovation, community growth, and institutional-grade features.

- 1 — Q4 2025
Platform launch, audit publication, and community scale-up initiatives.
- 2 — Q1 2026
Yield engine enhancements and optimization of reward distribution mechanisms.
- 3 — Q2 2026
Mobile app release and DAO governance framework discussions begin.
- 4 — Q3 2026
Institutional dashboards and advanced analytics tools for network leaders.

THANK YOU

Strength • Stability • Scale

This presentation is informational and not financial advice. DYOR. Rewards depend on smart-contract rules and user activity.
